Subject: RE: Hopi Arsenic Mitigation Project

Jeff,

The Hopi project is not new. It is the regional water system (HAMP) that Hopi has been working on for almost 10 years.

Just an FYI. Emmanuelle Rapicavoli is the new drinking water Project Officer for Hopi – as of January 1, 2017. She is copied on this e-mail. Emmanuelle can fill you in on what's new with the HAMP.

I have not had a chance to talk to Lionel since I heard about his doctor's visits a couple of months ago. I also think he recently got engaged. Good for Lionel.

Subject: Hopi Arsenic Mitigation Project

Bessie,

Karen Goldberg told me something about a project going on in the Hopi villages with regard to arsenic mitigation and I was wondering if this is something new and whether we should touch base again. As you know, we are still in a situation where the closure of the Tuba City Dump will require a source of water, and we have been looking into whether the infrastructure from that could be turned over to Moenkopi to assist with the Hopi water situation. There are complications (as always). But I don't know if that and what you've been working on now or if there is anything new.

I've heard that Lionel may be experiencing some health issues now and not sure if you've talked to him.

Jeff
